

# Remote Surveillance Services

Mita-Teknik offers several attractive remote surveillance programs, each designed to support your business when you need it. Our solutions are 100% flexible and can be customized to fit your specific needs.

## Mita-Teknik Remote Surveillance Services

Our Remote Surveillance Services are built on our long and proven track record in the wind industry. We have equipped more than 48,000 wind turbines with advanced control solutions, and have successfully developed more than 350 prototypes.

This experience and knowhow is now available to you in the form of a professional remote surveillance service. The service is cost competitive, 100% flexible on time and managed by experienced wind industry specialists. It includes a variety of programs to choose from, such as:

- › Time based surveillance contract
- › Flex surveillance
- › Fill in surveillance service - time and competencies
- › Training, consulting and support

Additional Services:

- › Turbine tuning for improved performance and availability
- › CMS data collection and analysis, vibration monitoring and faults detection

### Advanced SCADA System

For surveillance purposes, we use the Mita-Teknik developed SCADA system, MiScout. MiScout SCADA is an open, proven, reliable and cost effective solution designed to meet the rising demands in the wind industry, such as data security and analysis, predictive maintenance, forecasting and overall cost optimization.

### Flexibility

We are ready whenever you need us. Whether you need coverage 24/7/365 or just for a few hours, we have the solution for you. We cover:

- › Night shifts
- › Weekend shifts
- › Holidays
- › Vacations
- › 24/7 surveillance

### Surveillance Strategy

Mita-Teknik helps you to define the right surveillance strategy, including software review and condition monitoring. We can also help install the right communication solution, including new telecom setup.

### Surveillance Team

The Mita-Teknik surveillance team consists of dedicated and highly skilled engineers with years of experience in the wind industry. This means, that should a problem arise, our team will know exactly what to do to get your machines quickly back on track.

Mita-Teknik operate local Service Centers in Denmark, China, USA, Ukraine and India. In addition, we also partner with several independent service providers around the world.
